

MORLOCK ROTARY SYRINGE PAD PRINTING MACHINE

The "MORLOCK ROTARY VERTICAL PAD PRINTING MACHINE" is an automated high speed solution for Pad Printing on various objects.

It can be configured to print on items such as Disposable Syringes, Bottle Cap tops, Bottle Cap sides, Golf Balls, Pen Barrels, Oil Filter Bodies, Blood Vials, Automobile Controls, Microphone Handles, Beverage and Food Containers, Deodorant Applications etc.

The print head is designed for years of trouble free operations and is easily adjusted and cleaned.

Fixtures for various products can be easily indexed with the print head to ensure high resolution prints at high speeds.

Provisions have been made in the machine's design to interface with various automated feeding and ejection systems as well as to monitor the printing process by additions of counters and sensors.

Optional attachments
Bucket Elevator

DON'T JUST PAD PRINT IT, RITA PAD PRINT IT
